- Jest, Jest Preview, React-testing-library, Mock Service Worker, Cypress, Enzyme
- HTML, CSS, Design Systems
- Git, Python, Postman, Wireshark
- Web security: XSS, SQL injection, CSRF, path traversal, template injection

🔬 Projects

jest-preview ⭐

https://github.com/nvh95/jest-preview - www.jest-preview.com

- An open source package that increases DX when writing tests for frontend using Jest. It helps to preview the actual interface of application in NodeJS environment to an external browser such as Google Chrome.
- Reached **1800 stars on GitHub** from developers all over the world. Got starred by React Core Team Dan Abramov. Current having **10.000 downloads weekly** (and still growing).
- Was nominated in **The Most Exciting Use of Technology** category for React Open Source Awards 2022, part of React Summit.

react-linkedin-login-oauth2

https://www.npmjs.com/package/react-linkedin-login-oauth2

- An open source package that eases the integration of Login with Linkedin feature to your application with more than **5000** downloads per week.

Contribute to several open source software projects

- Participating in discussions about features, open issues, polishing documentation and committing code to open source software projects such as strapi, react-hook-form, mswjs, Next.js, create-react-app...
- Top 1 on GitHub Trending Developers several times.

🏫 Education

VNU University of Engineering and Technology

- Bachelor of Science in Computer Science - June 2017
